

President Bush Knows

Today, President Bush has given another in his series of excellent speeches that show that he is the right person for the job:

Remarks by the President at the 20th Anniversary of the National Endowment for Democracy, November 6, 2003.

Highlights:

In June of 1982, President Ronald Reagan spoke at Westminster Palace and declared, the turning point had arrived in history. He argued that Soviet communism had failed, precisely because it did not respect its own people -- their creativity, their genius and their rights.

President Reagan said that the day of Soviet tyranny was passing, that freedom had a momentum which would not be halted.

[...]

A number of critics were dismissive of that speech by the President. According to one editorial of the time, "It seems hard to be a sophisticated European and also an admirer of Ronald Reagan." (Laughter.) Some observers on both sides of the Atlantic pronounced the speech simplistic and naive, and even dangerous. In fact, Ronald Reagan's words were courageous and optimistic and entirely correct. (Applause.)

[...]

We've witnessed, in little over a generation, the swiftest advance of freedom in the 2,500 year story of democracy.

[...]

Our commitment to democracy is also tested in the Middle East, which is my focus today, and must be a focus of American policy for decades to come. In many nations of the Middle East -- countries of great strategic importance -- democracy has not yet taken root. And the questions arise: Are the peoples of the Middle East somehow beyond the reach of liberty? Are millions of

men and women and children condemned by history or culture to live in despotism? Are they alone never to know freedom, and never even to have a choice in the matter? I, for one, do not believe it. I believe every person has the ability and the right to be free. (Applause.)

Some skeptics of democracy assert that the traditions of Islam are inhospitable to the representative government. This "cultural condescension," as Ronald Reagan termed it, has a long history. After the Japanese surrender in 1945, a so-called Japan expert asserted that democracy in that former empire would "never work." Another observer declared the prospects for democracy in post-Hitler Germany are, and I quote, "most uncertain at best" -- he made that claim in 1957.

[...]

For the Palestinian people, the only path to independence and dignity and progress is the path of democracy. (Applause.) And the Palestinian leaders who block and undermine democratic reform, and feed hatred and encourage violence are not leaders at all. They're the main obstacles to peace, and to the success of the Palestinian people.

But read it all. It is quite heartening.
