

## Silliness

James Randi has invented a "**paranormal pyramid**". (Yes, really.) And for good measure, he has performed a very impressive card trick in space without leaving the ground. (By the way, can any of our readers tell us how it was done?)

Meanwhile Princess Diana, dead these six years, has succeeded in **becoming sillier**.

We have now called three apparently unrelated things "silly" in the past week or so. Coincidence? We don't think so.
