

Is France In Serious Trouble?

Roger L Simon **thinks so**, for several interrelated reasons. There's also a picture of an "occupied MacDonaldis" (occupied by anti-globalisation loonies, that is),

and quite an interesting comment thread there as well.

There is still a little bit of hope for France

Well, after all this bad news about France, let's at least feel good about some **good French people out there**. I'm going skiing there next week (I've heard they still have some good food, even if there's no service), so I need to believe something good about France!

Have you read the Decline and Fall of the Roman Empire?

History repeating itself??

Of course France also has massive amounts of farmland which continues to somehow prop up the socialist French economy. So maybe it's not all doom and gloom.

historicism

history doesn't repeat itself; people act on the same bad ideas.
